

# Andrew N. Poppick

Department of Mathematics and Statistics  
Carleton College  
One North College Street  
Northfield, MN 55057

phone: (507) 222-7791  
email: [apoppick@carleton.edu](mailto:apoppick@carleton.edu)  
web: <http://people.carleton.edu/~apoppick/>

---

## Research Interests

Statistical applications to climate and weather, temporal nonstationarity, spectral analysis, spatial-temporal processes

## Education

Ph.D., Statistics, University of Chicago, 2016

Advisor: Michael L. Stein

Dissertation: “Statistical Methods for Climatic Processes with Temporal Non-Stationarity”

B.A. (*with honors*), Statistics, University of Chicago, 2010

## Professional Appointments

Carleton College, Northfield, MN

Assistant Professor of Statistics, September 2016 - present

## Publications

McKinnon, K. A., Poppick, A., & Simpson, I. R. (2021). Hot extremes have become drier in the US Southwest, *Nature Climate Change*, **11**: 598-604.

Schwarzwald, K., Poppick, A., Rugenstein, M., Bloch-Johnson, J., Wang, J., McInerney, D., & Moyer, E. J. (2021). Changes in future precipitation mean and variability across scales, *Journal of Climate*, **34**(7): 2741-2758.

Poppick, A. & McKinnon, K. A. (2020). Observation-Based Simulations of Humidity and Temperature Using Quantile Regression. *Journal of Climate*, **33**(24): 10691-10706.

Poppick A., Nardi, J.\*, Feldman, N.\*, Baker, A. H., & Hammerling, D. M. (2020). A Statistical Analysis of Compressed Climate Model Data. *Computers & Geosciences*, **145**: 104599.

McKinnon, K. A. & Poppick, A. (2020). Estimating changes in the observed relationship between humidity and temperature using noncrossing quantile smoothing splines. *Journal of Agricultural, Biological, and Environmental Statistics*, **25**(3): 292-314.

McKinnon, K. A., Poppick, A., Dunn-Sigouin, E., & Deser, C. (2017). An “Observational Large Ensemble” to compare observed and modeled temperature trend uncertainty due to internal variability. *Journal of Climate*, **30**(19): 7585-7598.

Poppick, A., Moyer, E. J., & Stein, M. L. (2017). Estimating trends in the global mean temperature record. *Advances in Statistical Climatology, Meteorology and Oceanography*, **3**(1): 33-53.

Klavans, J., Poppick A., Sun, S., & Moyer, E. J. (2016). The influence of model resolution on temperature variability. *Climate Dynamics*, **48**(8): 3035-3045.

Poppick, A., McInerney, D. J., Moyer, E. J., & Stein, M. L. (2016). Temperatures in transient climates: improved methods for simulations with evolving temporal covariances. *Annals of Applied Statistics*, **10**(1): 477-505.

Poppick A. & Stein M. L. (2014). Using covariates to model dependence in nonstationary, high-frequency meteorological processes. *Environmetrics*, **25**(5): 293–305.

## Peer-Reviewed Conference Papers

Poppick A., Nardi, J.\*, Feldman, N.\*, Baker, A. H., & Hammerling, D. M. (2018). A Statistical Analysis of Compressed Climate Model Data. *The Fourth International Workshop on Data Reduction for Big Scientific Data (with SC18)*.

## Technical Reports

Nardi, J.\*, Feldman, N.\*, Poppick A., Baker, A., & Hammerling, D. M. (2018). Statistical Analysis of Compressed Climate Model Data. NCAR Technical Note NCAR/TN-547+STR, 60 pp, doi:10.5065/D6HQ3XQJ.

\*indicates undergraduate coauthors

## Teaching Experience

### *At Carleton College*

- STAT 120: Introduction to Statistics (Autumn 2016, Spring 2017, Winter 2018, Spring 2018, Winter 2019, Spring 2019, Autumn 2020, Winter 2021)
- STAT 230: Applied Regression Analysis (Winter 2017, Autumn 2017, Autumn 2018)
- MATH 240: Probability (Winter 2018)
- STAT 250: Introduction to Statistical Inference (Spring 2017, Spring 2019, Winter 2021)
- STAT 285: Statistical Consulting (Autumn 2018, Winter 2019, Spring 2019)  
*Clients have included: College Possible, Community Action Center of Northfield, Hennepin County, Mathematical Association of America, Metro Transit, Northfield Public Schools*
- STAT 320: Time Series Analysis (Spring 2018, Spring 2021)

### *At the University of Chicago*

As Instructor:

- STAT 200: Elementary Statistics (Spring 2013)

As Course Assistant:

- STAT 200: Elementary Statistics (Autumn 2011)

- STAT 220: Statistical Methods and Applications (Autumn 2009)
- STAT 222: Linear Models and Experimental Design (Spring 2016)
- STAT 224: Applied Regression Analysis (Autumn 2012, Autumn 2013, Spring 2015)
- STAT 244: Statistical Theory and Methods I (Winter 2012)
- STAT 343: Applied Linear Statistical Methods (Autumn 2015)
- STAT 345: Design/Analysis of Experiments (Winter 2014, Winter 2015)

## Undergraduate Research Projects Supervised

- Sarah Grier, Waleed Iftikhar, Nate Isbell, and Muyang Shi (Winter - Spring 2021). “Quantile regression with applications in temperature and agricultural analysis” (Senior Integrative Exercise)
- Trevor Freeland, Pedro Girardi, and Joseph Nardi (Autumn 2018 - Winter 2019). “A statistical analysis of changes in extreme precipitation in the coastal Carolinas” (Senior Integrative Exercise)
- Noah Feldman and Joseph Nardi (Summer 2018). “A statistical analysis of compressed climate model data”
- Melissa Bain, Caitlin Eichten, Il Shan Ng, and Lianne Siegel (Winter - Spring 2017). “Estimating the uncertainty in temperature trends due to internal climate variability” (Senior Integrative Exercise)

## Presentations

Observation-Based Simulations of Humidity and Temperature Using Quantile Regression, August 2021. Joint Statistical Meetings (virtual)

Observation-based simulations of temperature and humidity using quantile regression, February 2021. Environmental Data Science Lunch, University of Chicago (virtual)

Improved observation-based simulations of temperature and humidity accounting for projected variability changes from a climate model, August 2020. Joint Statistical Meetings (virtual)

Improved observation-based simulations of temperature and humidity accounting for projected variability changes from a climate model, November 2019. University of Minnesota School of Statistics Seminar, Minneapolis, MN

Statistical analysis of compressed climate model data, August 2018. CISL Visitor Program Brown Bag Seminar, National Center for Atmospheric Research, Boulder, CO. (with Joseph Nardi and Noah Feldman as primary presenters)

An 'Observational Large Ensemble' to compare observed and modeled temperature trend uncertainty due to internal variability, July 2017. American Meteorological Society Conference on Probability and Statistics, Baltimore, MD

An 'Observational Large Ensemble' to compare observed and modeled temperature trend uncertainty due to internal variability, March 2017. Ocean and Climate Physics Seminar, Lamont-Doherty Earth Observatory, Palisades, NY

Temperatures in transient climates: improved methods for simulations with evolving temporal covariances, August 2016. ENVR Student Paper Winner Topic Contributed Session, Joint Statistical Meetings, Chicago, IL

Using spectral methods to quantify changes in temperature variability across frequencies\*, December 2014. American Geophysical Union Fall Meeting, San Francisco, CA (\*presenting author: Andrew Poppick, first author: Shanshan Sun)

Bivariate, nonstationary, high frequency surface meteorological processes given known covariates, May 2013. Argonne National Laboratory, IL

## **Poster Presentations**

An 'Observational Large Ensemble' to compare observed and modeled temperature trend uncertainty due to internal variability, December 2017. American Geophysical Union Fall Meeting, New Orleans, LA

Trends and associated uncertainties in the global mean temperature record, December 2016. American Geophysical Union Fall Meeting, San Francisco, CA

Temperatures in transient climates: improved methods for simulations with evolving temporal covariances, January 2016. Conference on Probability and Statistics in the Atmospheric Sciences, American Meteorological Society Annual Meeting, New Orleans, LA

Observation-based simulations of future temperatures with changes in variability predicted by a climate model, August 2015. Invited poster presentation, STATMOS Statistics in the Atmospheric Sciences, Joint Statistical Meetings, Seattle, WA

Simulating future transient climates by combining observational data with climate model information using time-varying spectral methods, December 2014. American Geophysical Union Fall Meeting, San Francisco, CA

Time-varying spectral methods for modeling projected future changes in temperature variability and producing data-driven simulations of future transient climates, September 2014. STATMOS Annual Meeting, Chicago, IL

Using covariates to model dependence in nonstationary, high frequency meteorological processes, August 2014. Invited poster session, STATMOS/NCAR Statistics in the Atmospheric Sciences, Joint Statistical Meetings, Boston, MA

## **Grants & Funding**

Ethical Inquiry in the Classroom (EthIC) curricular grant, Carleton College, 2021 (\$1,200).

*For developing materials for discussion of ethical issues in the statistical analysis cycle in STAT 285 (Statistical Consulting)*

Computational and Information Systems Laboratory Visitor Program (CVP) travel grant, National Center for Atmospheric Research, August 2018 (\$2,500)

## **Awards & Honors**

ENVR Student Paper Competition, 2016

*Awarded for the manuscript "Temperatures in transient climates: improved methods for simulations with evolving temporal covariances", presented at JSM 2016*

David Wallace Award for Applied Statistics, 2015

*Awarded annually by the University of Chicago Department of Statistics to two students working on applications in scientific domains*

## **Selected Professional Service at Carleton**

*To the College:*

- Community and Civic Engagement Committee (2020 – present)
- Academic Standing Committee (2017 - 2019)

*To the Department:*

- Comps coordinator (2020 – present)
- Colloquium and events organizer (2017 - 2019)
- Statistics lab assistant training (2018 - 2019)
- Social activities coordinator (2016 - 2017)

## **Professional Service Outside Carleton**

Probability and Statistics Committee, American Meteorological Society (2015 - present)

Referee for submissions to: *Acta Geophysica; Advances in Statistical Climatology, Oceanography, and Meteorology; The American Statistician; Annals of Applied Statistics; Biometrika; Climatic Change; Harvard Data Science Review; Journal of Agricultural, Biological, and Environmental Statistics; Journal of the American Statistical Association; Journal of Climate; NSF Climate and Large-scale Dynamics Program*

Program Committee member for The 9<sup>th</sup> International Workshop on Climate Informatics (Paris, France, October 2019)

## **Other Professional Experience**

Statistical Analyst at The Cambridge Group, Chicago, IL

June 2010 - June 2011
