

RESIDENCE HALL HEATING HOW-TO

COURTESY OF ENERGY CLUB

James

- Rooms are heated by in-floor heat
- Thermostat can be adjusted up or down using the slider covered by the panel on the right
- Temperature range is 60°F (bottom) to 70°F (top)
- Ignore the numbers on the slider; they do not align with the actual temp setting!

This button does nothing!

Tips to stay cozy:

- It will take a few minutes for the heat to start working! Be patient
- Closing the curtains/blinds can provide extra insulation
- If your room is too hot, use these instructions to turn your heat down (DON'T open the window!)
