

RESIDENCE HALL HEATING HOW-TO

COURTESY OF ENERGY CLUB

Burton

- Controls are located on/near the vented radiator
- Each radiator in the room has its own control dial
- This dial controls heat output; we recommend setting it to the dot between the 3 and 4
- Adjust the dial up for more warmth if needed

Tips to stay cozy:

- It will take a few minutes for the heat to start working! Be patient
- Closing the curtains/blinds can provide extra insulation
- If your room is too hot, use these instructions to turn your heat down (DON'T open the window!)
