Berkman, P. A., Lang, Michael A., Walton, David W. H., and Young, Oran, eds. *Science Diplomacy: Antarctica, Science, and the Governance of International Spaces*. Washington, D.C.: Smithsonian Institution Scholarly Press, 2011. This edited volume covers a range of topics related to the Antarctic Treaty, scientific research in Antarctica, the influence of tourism on the Antarctic natural environment and many other topics. It uses the Antarctic Treaty as a basis for discussing governance of other international spaces. LONGITUDE

Hillemann, Eric. *A Beacon So Bright: The Life of Laurence McKinley Gould*. Carleton College, 2012. Hillemann's biography of Larry Gould covers his life from his Michigan roots, education and military service, to his role in the Byrd expedition of Antarctica in 1928-30 and his subsequent careers at Carleton College and the University of Arizona. Hillemann skillfully highlights the personal traits that led to Gould's success at everything he endeavored. Hillemann also emphasizes the themes Gould returned to again and again – the importance of personal and intellectual independence, the key role of education in advancing individuals and society, and the mutual relationships of science and the other humanities. LONGITUDE

Laurence M. Gould. ***Cold: The Record of an Antarctic Sledge Journey***. Carleton College, 2011. Gould's book, published in the year after the first Byrd expedition to Antarctica (Gould was chief scientist and second-in-command), focuses on the six-man dog sledge journey Gould led into the Queen Maud Mountains during the austral summer of 1929-30, though he also describes other exciting aspects of this trip, the first of seven that Gould would make to Antarctica. For the new edition in 1984, Gould added an epilogue reflecting on his leadership during the International Geophysical Year of 1957-58 and the signal achievement of the multinational Antarctic Treaty, which became effective in 1961 at the height of the Cold War. First published in 1931. (PAPER, 243 Pp., To order, go to or call Carleton College Bookstore at 507-222-4153, or visit online at <https://apps.carleton.edu/campus/bookstore/>)

National Academy Press. ***Future Science Opportunities in Antarctica and the Southern Ocean***, 2011. This report focuses on the major (current and future) scientific research questions involving Antarctica and the Southern Ocean. These questions range from climate change to ecosystem evolution to solar system weather and the origin of the universe. The background material reads like an introductory science textbook focused on Antarctica. Helpful diagrams illustrate the main points. (ONLINE, 195 Pp.
